Specialist Oral Surgery Dental Implantology Clinic

## Centre Of Excellence

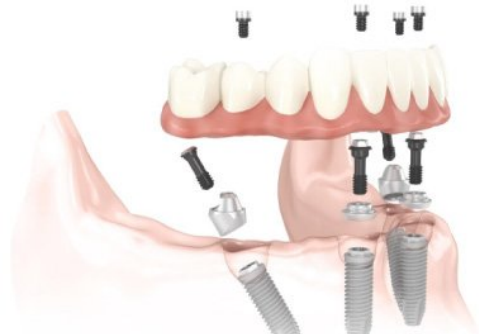

Mr. Darren McCourt Specialist Oral Surgeon

All-on-4 is a treatment option to restore the upper and lower dental edentulous arches. This treatment concept provides teeth that can be fixed in the mouth permanently removing the need to wear bulky uncomfortable dentures that move. Castle Clinic Dalkey provides this Nobel Biocare treatment option now for over twenty years. Below is a photograph (1) of the four implants we placed in the upper jaw bone. The fixed bridge (2) photograph from another case is taken five years later on follow-up.

### All-on-6

6 Nobel Biocare dental implants are placed when possible to restore the upper jaw bone.

### All-on-6

Final Fixed bridge is screwed permanently in the mouth.

Here are some dental implant cases we have completed at the Castle Clinic.

The first photograph shows a milled titanium bar with locator attachments then added to the bar so the denture can 'snap on'. Another option is a cast bar that is again screwed onto the implants. The teeth then 'click' onto the implant bar and are secure.

## “My All-on-4 dental implant treatment at Castle Clinic has changed my life”

The four very long implant screws in the above far right x-ray at the top of the page are called zygomatic implants. We use these implants when there is very little or no bone to allow conventional dental implant treatment. There is an implant solution for all cases. To explore your options further please contact our reception team.

Mr. Darren McCourt is an experienced specialist Oral Surgeon with over twenty years experience in placing dental implants. Surgery is undertaken under local anaesthesia with IV sedation in Dalkey or General Anaesthesia at the Blackrock Clinic.

A consultation will involve clinical examination, x-rays and possibly a CT scan. Treatment options will then be discussed.

Nobel Biocare is a premium dental implant system. There are cheaper dental implants on the market that do not have the same scientific data with their product. Our advice is don't go cheap on implant product.
